

# An example of new application of our new product was introduced in Japan Metal Daily

April 14, 2022

Our decorative stainless steel product was introduced in Japan Metal Daily as it's a symbol of beginning to show its presence not only in the construction material, such as elevators and exterior fields, but also in the interior of restaurants and custom-made kitchens (published on 4/14). NEUES series' new color "Moss Green" was adopted for first time last year for the custom salad Crisp Salad Works Roppongi Hills store, the table counter, cupboard and storage door were all made with Hairline finish green colored stainless steel that gives off simple, clean and calm atmosphere. There is another store opened in Kansai for the first time at Hankyu Sanbangai Osaka on March 24<sup>th</sup> that was also decorated with this Moss Green color.

The black stainless steel product "NINJA BLACK96" released in 2020 has also expanded its field of usage, a major kitchen equipment company Tanico has been making a large number of high-class, order-made kitchens using NINJA BLACK96. The material is applied for drawers and the sides of island kitchens, the dark black harmonizes with the marble and wood which has been gaining popularity with its design aesthetic.
