

We are participating at Material Connexion Exhibition 2023

Sep. 26th, 2023

We will be exhibiting at the Material Connexion Exhibition 2023 with various decorative stainless steel materials, which you can touch and experience real texture, color and shininess of material. We will provide samples which combine surface design, coloring and functional coating. We believe you can find a new value and potentiality of decorative stainless steel. We are looking forward to seeing you there.
